

# 2010 Rates

## Lake Country Power's rates for special heating and cooling programs:

Rates and heating comparisons do not reflect wholesale power cost adjustments of up to 2.5 cents per kWh from our supplier that can add to monthly energy costs. Estimated 2010 cost rider for general service rates: 2.383 cents per kWh, and zero, on average, per kWh for Energy Wise programs.

### Water heating

**Off-Peak** . . . . . 4.0¢ / kWh  
Heats your water for eight hours during overnight "off-peak" hours. Required tank storage capacity of 105 gallons to participate.

### Space heating

**Off-peak** . . . . . 4.0¢ / kWh  
Charge and store heat for eight hours during "off-peak" hours, release heat during on-peak hours. See [www.steffes.com](http://www.steffes.com) for more information or [www.heatforlessnow.com](http://www.heatforlessnow.com) for a dealer near you.

**Dual Fuel** . . . . . 5.1¢ / kWh  
Must have automatic back-up gas, propane or fuel oil. Wood and uncontrolled electric do not qualify as a back-up source. Dual Fuel is subject to 400 hours of control during the heating season (Oct 15 - April 15).

### Cycled/Interruptible air conditioning

Cycled air (metered) . . . . . 5.1¢ / kWh  
Cycled air (unmetered) . . . . \$10/mo. credit for June, July and August

During control periods for both programs, units are "cycled" in 15 minute intervals.

### Heat pumps

Air-source . . . . . 5.1¢ / kWh  
Ground-source . . . . . 8.7¢ / kWh  
    nine month rate (Jan.–May/Sept.–Dec.)  
Ground-source . . . . . 10.7¢ / kWh  
    summer rate (June–Aug.)

Both air-source and ground-source heat pumps use the general service rate if no back-up system is installed, otherwise it will qualify for the dual fuel rate if you install a back-up heating system.

## Water Heating & Home Heating Cost Comparison

Propane	Off-Peak 4.0¢/kWh electricity	Dual Fuel 5.1¢/kWh electricity
70% Efficient (standard unit)	Equivalent to 75¢ propane (per gal.)	Equivalent to 96¢ propane (per gal.)
90% Efficient (high efficiency unit)	Equivalent to 97¢ propane (per gal.)	Equivalent to \$1.23 propane (per gal.)
Fuel Oil	4.0¢/kWh electricity	5.1¢/kWh electricity
60% Efficient (standard unit)	Equivalent to 97¢ fuel oil (per gal.)	Equivalent to \$1.24 fuel oil (per gal.)
80% Efficient (high efficiency unit)	Equivalent to \$1.29 fuel oil (per gal.)	Equivalent to \$1.65 fuel oil (per gal.)

\*Note: Lake Country Power must have a way to turn on and off or "control" your heat and/or water heating, so you must have your system(s) properly wired to our meter and radio receiver for that control. Programs may require an additional meter.

### General Service Rates for Comparison

. . . . . 8.7¢ / kWh (general rate)  
. . . . . 10.7¢ / kWh (June - August)  
. . . . . \$22.50 (monthly facilities charge)

The monthly facilities charge recovers a portion of the co-op's local cost of delivering electricity to members. Part of our "fixed" costs are also collected through the kilowatt-hour charge. The facilities charge:

- Accounts for the co-op's investment in equipment like poles, wires and transformers, as well as labor to provide members with safe and reliable electric service.
- Supports fleet, facility and member service functions, such as line maintenance, right-of-way clearing, member service support and administrative responsibilities.
- Is similar to monthly fees that other utilities charge, such as telephone service providers.

### Renewable wind energy

Wellspring. . . . 50¢ per 100-kilowatt-hour block
